

Ice Aviator Number 55

Lyrics

Shrouded in an ageless place

Who can survive the frigid zone of outer space?

Twirl the dice and two fives appear

The door slowly opens

Frozen arms and legs begin to move

Tiny drops of water fall to the ground

Body made of ice

A.I. no longer in a cryogenic state

A new adventure awaits

Chorus (2 lines)

Finish your mission and try once more

What is your score?

A third chance for those who remain

For they cannot adjust to life on a lunar base

Thrusters scream with propulsion

Destroyed by aliens in their natural habitat

54 went before and never came back

Too many dimensions for ice machines to overcome

But there is one...who can carry the year

Ice aviator number 55

Chorus (2 lines)

Finish your mission and try once more

What is your score?

Lasers firing all at once

They can't bring down 55

You can see the number on its back

Another assignment for major H2O?

Take my advice and make your peace

With Ice aviator number 55

Chorus (2 lines)

Finish your mission and try once more

What is your score?
