

Infinite Storm Computer

Lyrics

Is this the greatest company constructed on planet Earth?

The two crossed wormholes people see, they know exactly what it means.

Empowered to create great things like never before.

We cannot forget...Infinite Storm Computer.

No one can compete with them.

\$2 trillion in revenue.

Is there anything it cannot do?

No firm can overcome ISC.

The production line moving 24 hours a day.

A life expanding device.

The rise in profits people see, they know exactly what it means.

Empowered to create great things like never before.

We cannot forget Infinite Storm Computer.

The scholars will write of a computer like no other

Rogue firm may close down the show, at this point we cannot know.

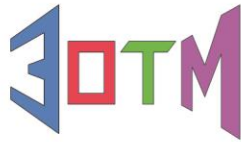

Infinite Storm Computer.

Infinite Storm Computer.

Infinite Storm Computer.

Infinite Storm Computer.

Infinite Storm Computer.

Infinite Storm Computer.

Meaning

This song describes Timothy Magellan's company, Infinite Storm Computer. The song offers high energy music/tempo that combines nicely with the optimistic lyrics.

ISC is a very large and profitable company. It is a firm that empowers humanity through the sale of the Knowledge Racer. Demand for the Knowledge Racer far exceeds supply.

Babbage tries to comprehend what life would be like as the CEO of a large company.

The intro has a martial/Scottish vibe (the lead guitar work sounds like "bagpipes"). Tempo and tone of vocals is "upbeat." There is also a "Phrygian" flavor (lead guitar work) in parts of the song. The chorus "Infinite Storm Computer" is repeated six times at the end of the song; we wanted the listener to remember the name.
